Patient Information

- Toolbar: provides instant access to all patient information
- Supports up to 9 insurance policies
- Electronic claims submission
- Real time eligibility
- Real time claim status

- Electronic Prescription, Integrated
- Patient alerts on recall status and other information
- Digital imaging integration
- Paperless office, Document management
- Multi-window layout, customizable views
- Sizeable windows

Electronic Appointment Book

- One click on appointment to get instant access to patient records.
- Tickler File: controls missed, cancelled and yet-to-be scheduled appointments.
- Short Call List: allows management of patients available on short notice, to fill last minute cancellations.
- Display Provider and Operator schedules.
- Allows user to double book appointments.
- Schedule doctor and assistant time.
- Reserved Time Shades: Label time slots for reserved procedures or other activities.
- Daily and weekly views.

Patient Recall

- Recall Procedures: Trigger the update of the patient's recall date on service entry. Practice has option to define unlimited number of recall procedure codes.
- Recall Appointments: Schedule and track recall as pre-appointed or non-appointed.
- Recall Process: A comprehensive method for selecting and contacting both pre-appointed and/or non-appointed patients that are due for a recall.
- Patient contact methods: email, post cards, lists, labels and letters. Link to **Automated Patient Communication** systems.

Patient Billing

- Instant billing with superbills or quickstatements
- Statement options: customized messages, based upon patient and/or expected insurance amounts
- Billing options: payment plans, contract billing, finance charges and choice of family or individual patient billing
- Billing cycles for monthly or daily billing

Insurance Billing

- ICD-10 CM diagnosis codes submitted on ADA 2012 Claim Form
- All insurance claims can be submitted electronically, printed immediately or through end of day batch.
- Real-time patient eligibility verification and claim status reports
- Unlimited fee schedules to accurately estimate expected patient and insurance co-payment amounts at time of service.
- Trojan Employer Insurance Database* fully integrated with immediate access to insurance and co-payment information.
- Claim management tools designed to ensure that all eligible claims have been submitted to all insurance carriers.

Treatment Planning

- Multiple treatment plans: each with phases of treatment.

Referral Tracking

- Referred By: track all incoming referrals from doctors or patients, from advertisements or marketing media
- Referred To: track outgoing referrals to specialists
- Referral Analysis: analyze referrals' impact on production, based upon date patient was initially seen by your practice or when treatment began

Mail Merge

- Create your own reports: analyze practice data; email patients identified from selected criteria, generate data into report format, lists, letters & labels. Use integrated word processor or Microsoft Word. Email patients based on data provided from custom reports.

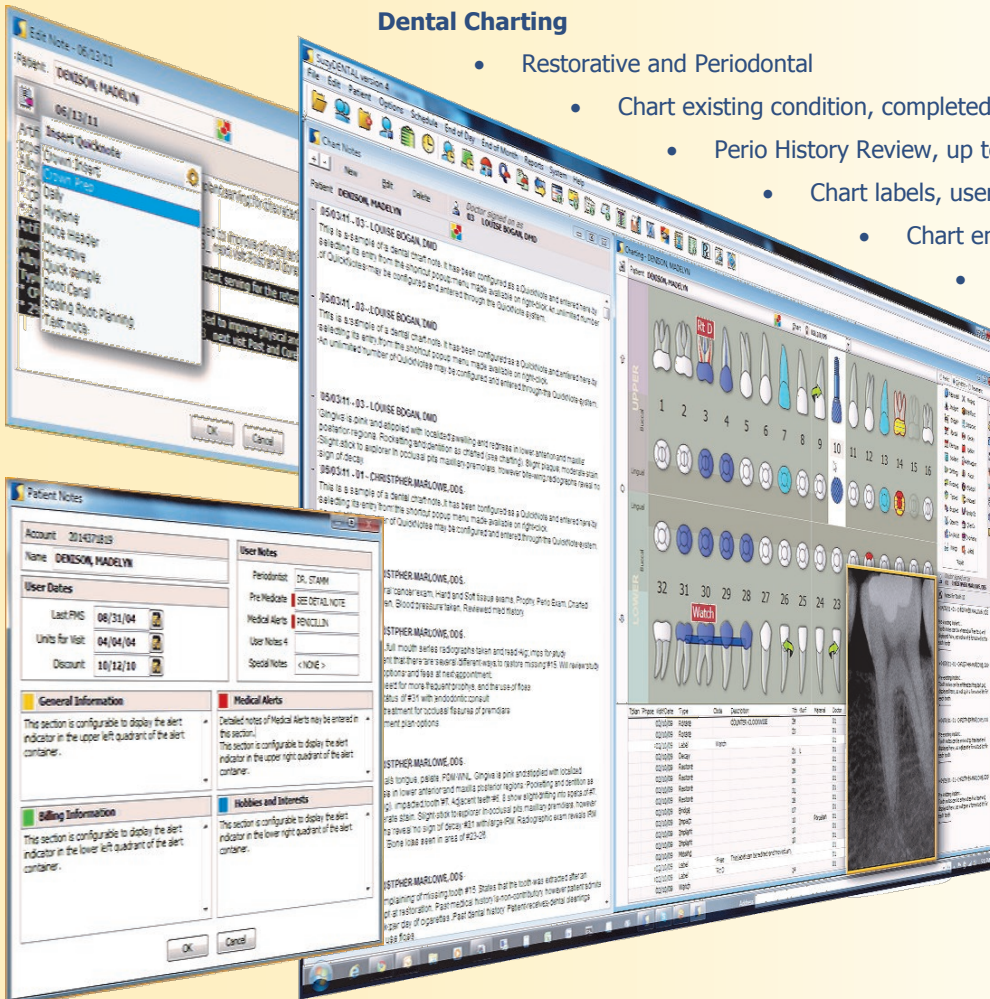

Reports

- Accounts Receivable Reports track aged patient and insurance balances, overdue payments, production and collection
- Procedure Reports include procedure analysis and comparatives, procedure reimbursement
- Insurance Reports examine insured patients and insurance analysis, outstanding claims, unused benefits

Office

Deeply committed to the data processing needs of business since 1977, the computer experts of Suzy Systems, Inc. understand that it's the right technology that will make the difference in helping you achieve your practice's goals.

With offices in New Jersey, California and a dealer network, Suzy Systems provides a full range of computer products and services to the health care industry. Experienced, top quality support and training staff is always available to our clients and we offer practice consulting as well.

We specialize in dental office automation and our SuzyDENTAL practice management system has been used by offices for over 30 years. Its evolution has been driven largely by client input as a source of enhancements combined with our ability to convert existing client data.

Suzy Systems is not a giant conglomerate. Large enough to provide services to an ever growing list of clients, we are dedicated to continue providing individual attention, personalized service and software products highly customized to meet the needs of our every client.

SuzyDENTAL V4 Supported on 32-bit and 64-bit Operating Systems:

- Windows® 10
- Windows® 8/8.1
- Windows® 7
- Windows® Server 2012
- Windows® Server 2008

Please call for recommended system and network configurations.

For earlier versions of SuzyDENTAL, please contact our support department for details regarding system requirements.
